

Synergy3Dsolutions

MANUFACTURING SERVICES

FOCUS AREA'S

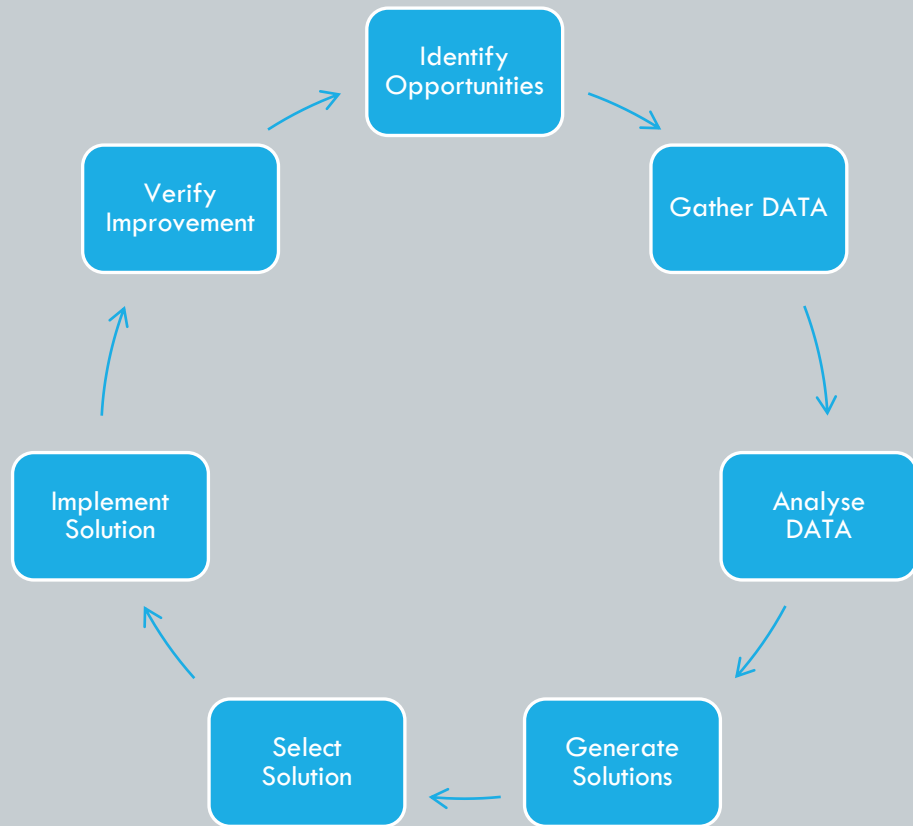

TAKT reduction in process

Lower production costs

Reliability of production

APPROACH

Apply this approach to your current manufacturing process with the intention of achieving cost reduction through -

- Increased output
- Reduced labour costs
- Increased uptime (maintenance plan)

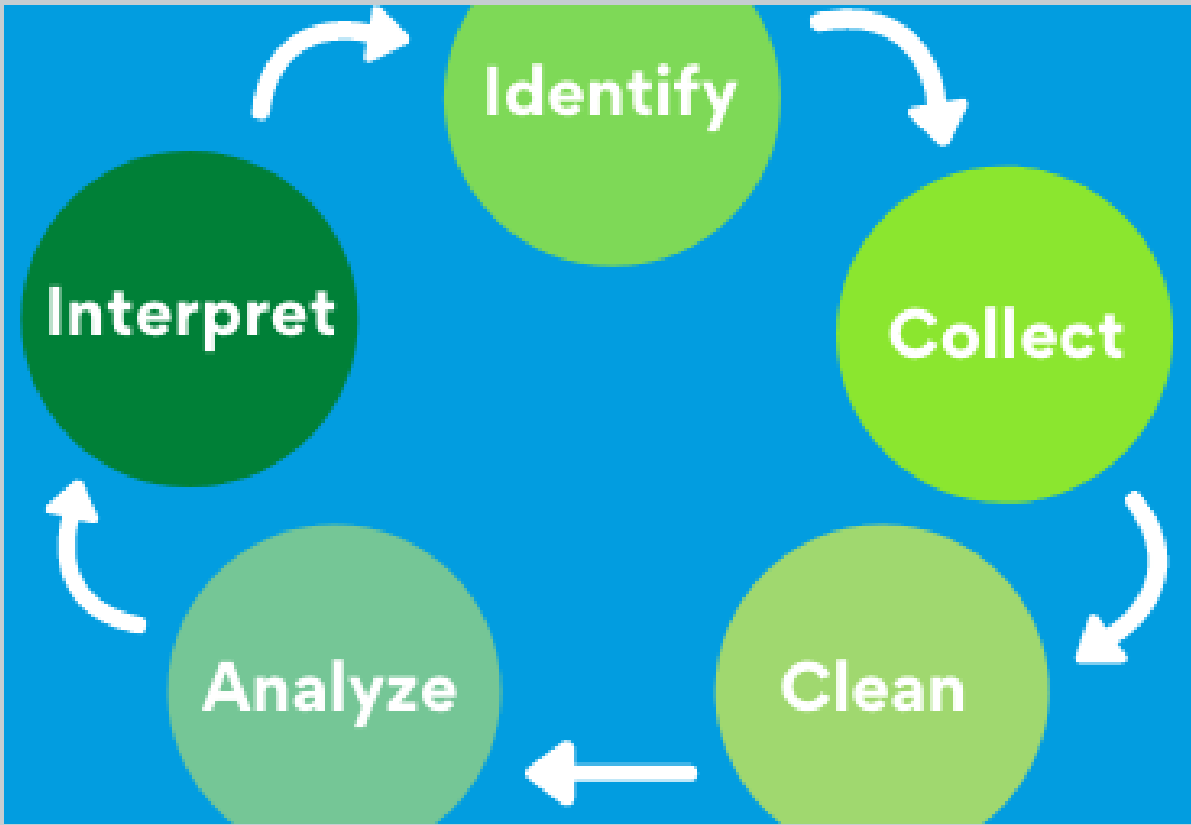

IDENTIFY OPPORTUNITIES

Attend site and review current processes with an outside perspective whilst pulling on various manufacturing experience to define next steps.

GATHER DATA

Collect information from line operators, collect TAKT time information and unplanned stoppage information to support next steps.

Review Data collected to identify largest area of benefit to your manufacturing process.

ANALYSE DATA

GENERATE SOLUTIONS

Compile a list of suggested solutions to implement to achieve original targets -

- Increased output
- Reduced labour costs
- Increased uptime due to preventative maintenance plan

SELECT SOLUTIONS

Pulling on vast manufacturing experience - support decision making and next steps through to delivery of chosen solution.

IMPLEMENT SOLUTIONS

Support with the
implementation of the chosen
solutions.

VERIFY SOLUTION

Gather DATA with improvements implemented to verify solutions and consider further improvement opportunities.
