

Synergy3Dsolutions

PRODUCT DESIGN SERVICES

APPROACH

Collaborating with Synergy allowing customers to make ideas a reality.

Applying this approach, we will guide you from Idea's through to manufacture.

IDEA

PRODUCT

DEFINE - DESIGN SOLUTIONS

Synergy allows customers to discuss their ideas/needs and have the right support through design to project completion.

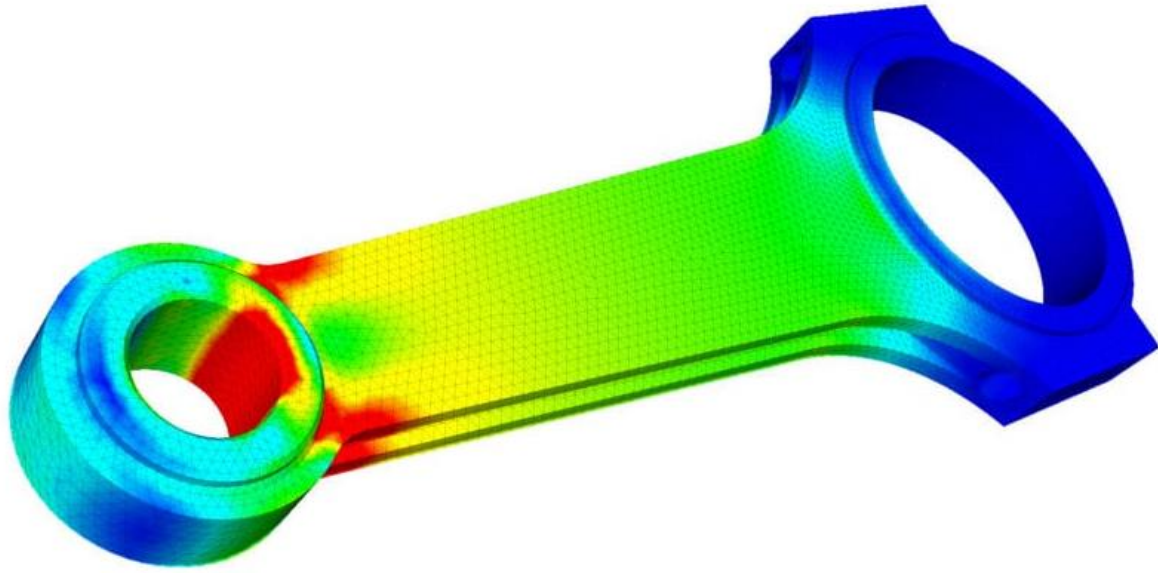

3D

SOLIDWORKS
3D CAD

Using the latest CAD Software and adopted practices we can develop ideas into 3D designs allowing for multiple iterations through design development.

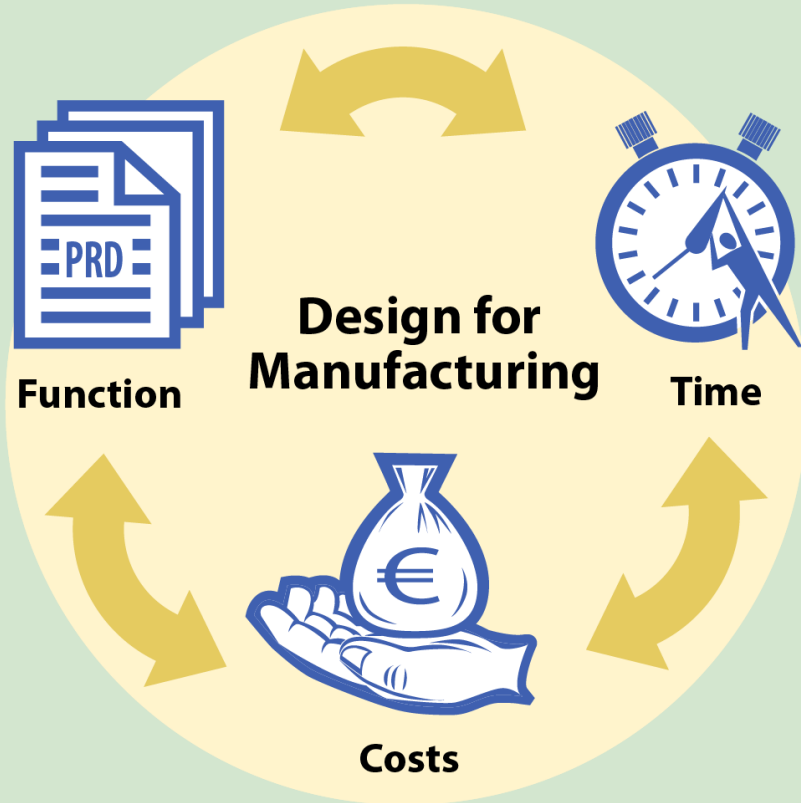

DESIGN- SOLIDWORKS

VERIFY -FEA SIMULATION

Synergy allows customers to optimise the Mechanical Design process.

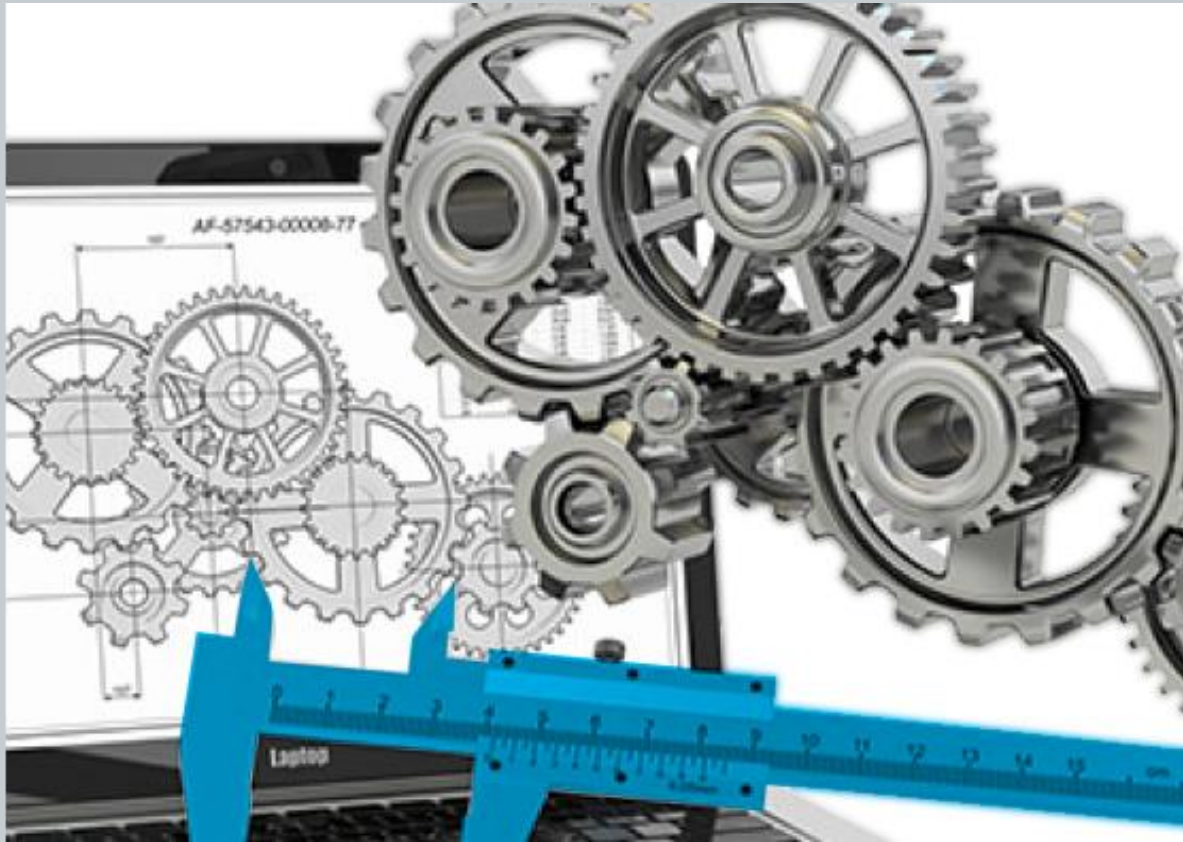

Verification at this stage is crucial and a valuable tool prior to manufacture.

MANUFACTURE

During the design phase we will consider the manufacturing process required to deliver your project.

Ensuring you can produce your product on time and in budget.

VERIFY - PHYSICAL

Synergy can design and support various tooling & drawing packages as required.

- Test Fixtures
- Inspection Fixtures
- Assembly Fixtures
